

Kawarthas Naturally Connected (KNC) Preferred Scenario

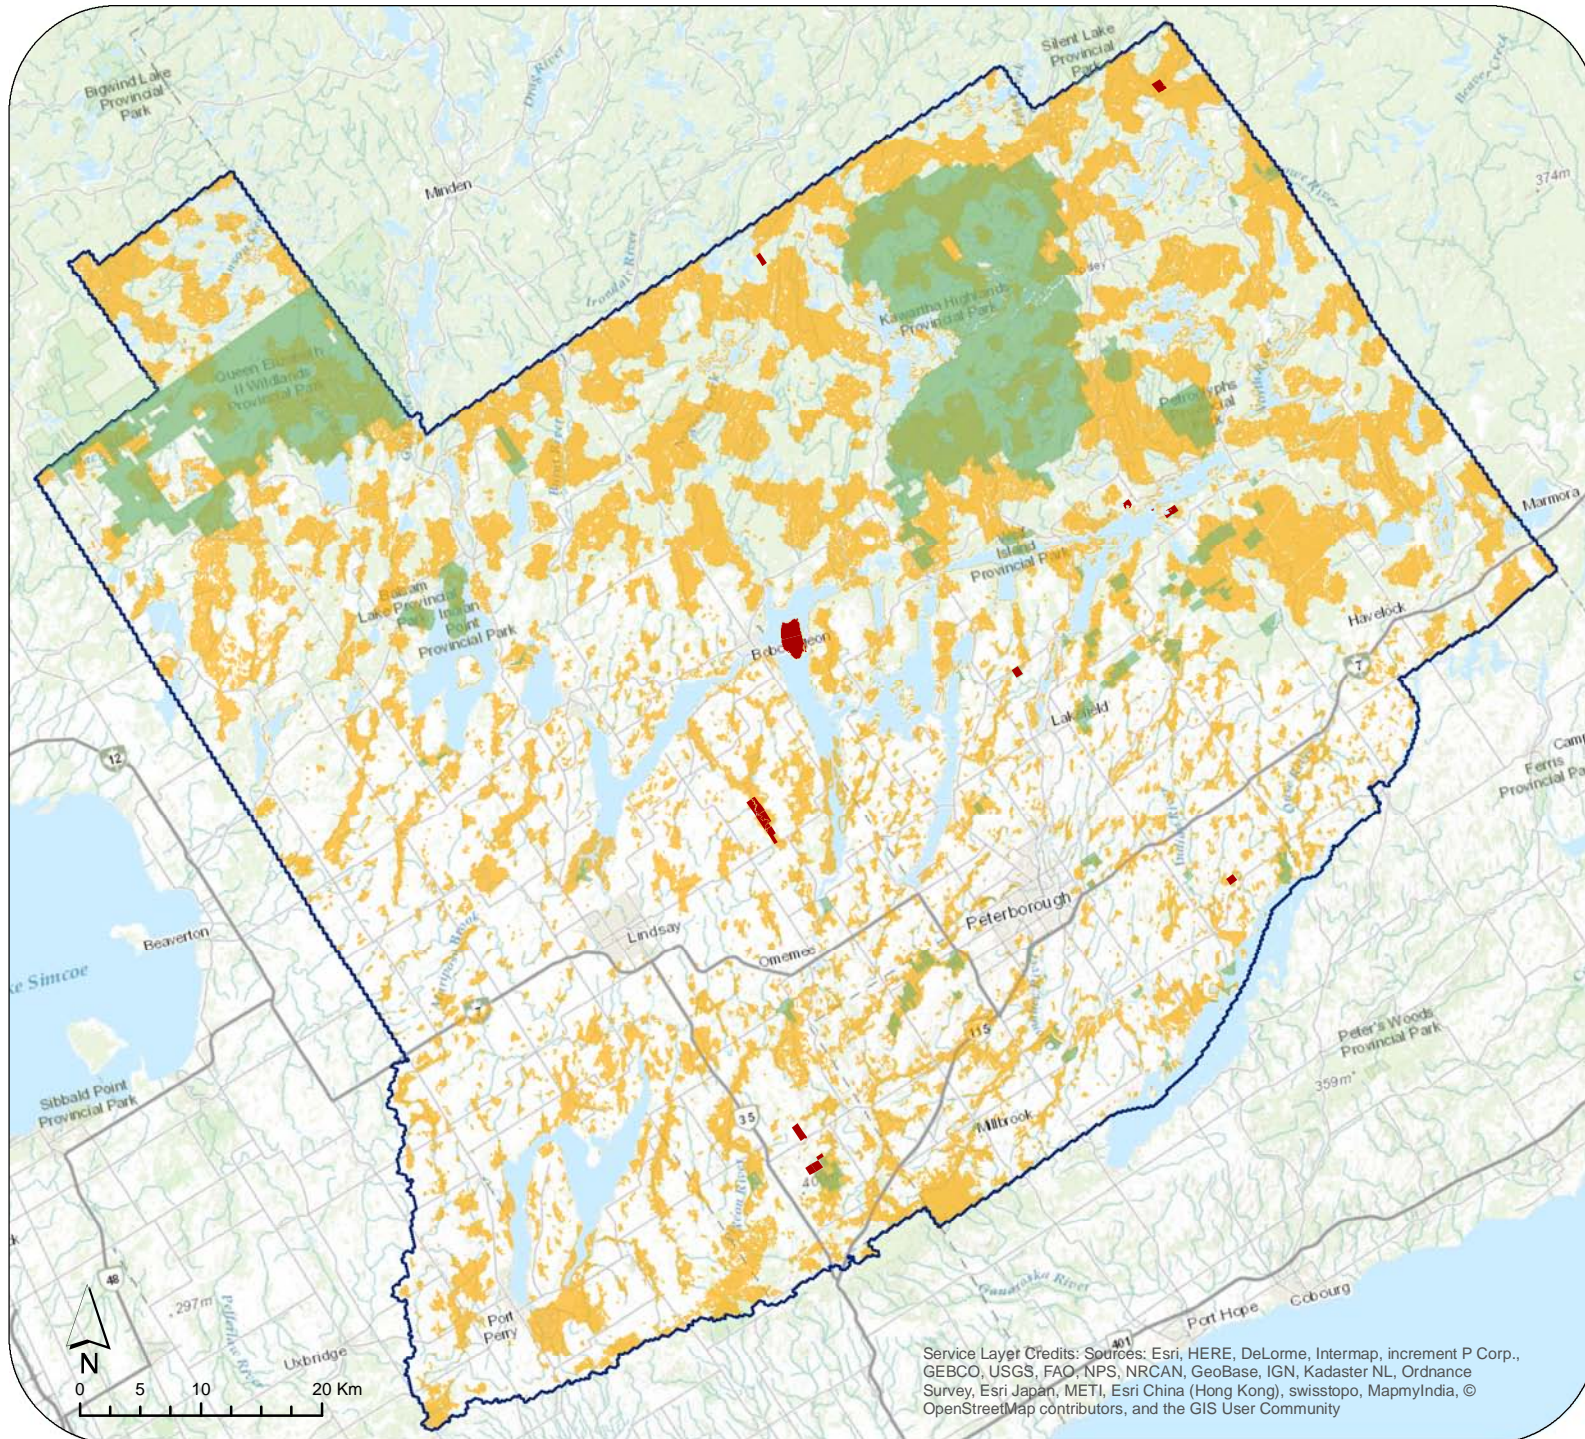

KAWARTHA LAND TRUST
Protecting the land you love.

The KNC project is a collaborative process that used scientific methods to identify which areas of our landscape should be protected to create a Natural Heritage System. This process identified critical ecological areas crucial in maintaining the health of the landscape. The analysis showed that 29% of our landscape needs protection, only 13% is currently protected. Mapping and data from KNC is being used by KLT to target and prioritize its goals for securement.
